

ABDUL AZEEZ FAIZ

Canada ON | (647) 877-5116 | abdulazeez.faiz1996@gmail.com | <https://www.linkedin.com/in/faizabdulazeez/>

Summary

Full Stack Developer with 6+ years of experience designing, modernizing, and supporting **cloud-based enterprise applications** across logistics, insurance, automotive, and consulting domains. Proven expertise in **C#, .NET Core, Angular, Azure Cloud, and microservices**, with hands-on experience in **cloud migration, real-time data processing, and production support**. AWS and Azure certified professional known for **driving scalable solutions, reducing defects through RCA, leading Agile teams, and collaborating with cross-functional stakeholders** to deliver high-impact, secure, and high-performance applications.

Skills

- **C# & .NET Core Application Development**
- **Angular (8–17) & Modern Front-End Development**
- **Azure Cloud Services (App Services, Functions, APIM, SQL, ADF)**
- **Microservices Architecture & RESTful APIs**
- **Cloud Migration & Application Modernization**
- **SQL Server & Azure SQL Database Management**
- **Architecture Design & Technical Leadership**
- **Event-Driven & Real-Time Processing (Kafka, Azure Functions)**
- **CI/CD Pipelines & DevOps (Azure DevOps, GitHub, JFrog Artifactory)**
- **Agile/Scrum Delivery & Cross-Functional Collaboration**
- **Performance Optimization & Production Support (RCA, Monitoring)**
- **Testing & Quality Engineering (Unit, Integration, UAT, WCAG)**

Experience

TMMC

October 2024 to Current

Software Developer

Canada, ON

- Diagnosed, troubleshoot, and resolved **critical, high-impact production issues in complex C#/.NET applications**, ensuring exceptional system availability and optimal performance.
- Conducted thorough **root cause analysis (RCA)** on recurring incidents to implement robust, permanent fixes, significantly reducing future system failures and downtime.
- Executed and meticulously monitored routine **weekly maintenance activities**, including comprehensive data cleanup, systematic log archival, and detailed performance health checks.
- Designed, developed, and deployed highly **scalable, secure .NET Core applications** that were precisely aligned with evolving business and technical requirements.
- Proactively collaborated with **cross-functional development** and operations teams to drive continuous improvement, strategic feature enhancements, and end-to-end system optimization.

Deloitte

September 2023 to December 2023

Solution Developer

Canada, On

- Designed and delivered **18+ custom workflows** on the **Collibra platform**, translating business requirements into scalable, well-governed solutions.
- Conducted in-depth analysis of existing workflows to identify root causes behind **26 recurring production issues**, implementing corrective actions that reduced defect recurrence by **40%**.

- Established a **cross-functional collaboration and validation process** to assess system performance and quality metrics, ensuring **full compliance with end-user requirements**.
- Acted as a key liaison between **onsite and offshore teams**, enabling effective communication, alignment, and timely delivery across development cycles.

Infosys Limited

December 2021 to December 2022

Specialist Programmer

India

- Designed and developed enterprise web applications for global logistics clients (XPO Logistics, WATCO) using **.NET Core, Angular, Azure Cloud, MS SQL**, delivering scalable and high-performance solutions.
- Implemented **real-time data ingestion and processing** using **Kafka, Elastic Search, Azure Function Apps**, supporting quote calculation, customer requests, and microservices communication.
- Built and managed **8+ RESTful APIs** for microservices architecture, integrated **Azure APIM**, database triggers, and **C# event aggregators** to ensure reliable system workflows.
- Led **Agile/Scrum teams**, delivered MVPs within **4 weeks**, collaborated with **10+ cross-functional stakeholders**, and actively contributed to **architecture design and decision-making** for high-impact projects.
- Mentored and onboarded new team members while managing **Azure resources (VMs, Functions, Tables)**, **GitHub**, and **Kanban boards**, ensuring smooth delivery and alignment with business goals.

Cognizant Technology Solutions

September 2018 to December 2021

Software Engineer

India

- Upgraded, migrated, and integrated **8+ enterprise applications** for **AXA Global**, transitioning workloads from Private Cloud to **Azure**, managing **30+ project binaries** using **JFrog Artifactory**.
- Modernized **10+ legacy codebases**, upgrading **.NET Framework to .NET Core** and **Angular 9 to Angular 13**, and executed a seamless **SQL Server to Azure SQL** data migration.
- Architected and configured **12+ Azure App Services and Azure Function Apps** to host scalable backend APIs, background jobs, and cloud-native services.
- Transformed the **CIMAX standalone application** into a modern web application for **RCIS-ZURICH**, extracting **90% of business logic** from VB .NET and rebuilding using **Angular, C#, Web API, and Azure**.
- Improved application performance and quality by implementing **RxJS custom grids, NgRx Store**, achieving **95% unit test coverage**, and supporting **regression, SAT, and UAT** in close collaboration with QA and stakeholders.

Education and Training

Conestoga College

January 2024

Post Graduate Diploma in Web Development: Web Development

Canada

VTU

July 2018

Bachelor of Engineering Technology: (Electronics And Communication)

India

Certifications

AZ204: Azure Developer Associate

DP900: Azure Data Fundamentals

AWS Certified Cloud Practitioner

AZ900: Azure Fundamentals
